SUMMARY

Full-stack engineer with 5+ years of experience building scalable production **Ruby on Rails**, **React** and **TypeScript** systems for financial and operational platforms. Owned **end-to-end** delivery of features, integrations and performance improvements. Worked across product, design and leadership to ship tested software at scale in production environments

PROFESSIONAL EXPERIENCE

Wein Law Firm, Software Engineer | New York, United States - *Building Internal Legal Platform* **Nov 2025 – Present**

Skills: React.js, Ruby on Rails, AWS, PostgreSQL, MongoDB, Redis

- Owned end-to-end architecture and technical direction as the first engineering hire, partnering with the CTO to build and scale an internal collections platform used daily by 10+ attorneys and paralegals
- Designed and integrated a custom **Google Document AI** processor into a Rails application to extract key legal data and combined it with **LLM-based workflows** to automate document generation and standardize legal records
- Built REST APIs using Ruby on Rails for production systems to migrate spreadsheet-driven operations into a centralized backend system, reducing manual effort by **40%** and improving turnaround time for case handling
- Refactored core data models, APIs and access controls in a Rails and React application, optimizing **AG Grid**-based workflows to support concurrent case handling

Yubi, Senior Software Engineer | Chennai, India - *Built and Led Integrations*

Oct 2022 – Dec 2023

Skills: React.js, Ruby on Rails, AWS, PostgreSQL, MongoDB, Redis

- Architected and led development of a Ruby on Rails **microservice** with scalable backend architecture and data models to unify banking APIs, reducing integration effort by 70% and onboarding time from weeks to days
- Drove full-stack development of a high-scale financial monitoring system processing **\$8.48B+** in deal volume using **Rails** and **Kafka**, designing backend APIs and analytics pipelines to improve portfolio visibility
- Reduced dashboard load time by **30%** by rebuilding the **React UI** with **GraphQL** and Chart.js, working with designers to ensure **WCAG compliance** and enhance customer experience on high-traffic dashboards
- Led React **v16**→**v17** migration, enforced TypeScript and refactored shared modules, mentoring **3 engineers** to align coding practices and improve scalability, reliability and long-term maintainability

Yubi, Software Engineer | Chennai, India - *Optimized APIs and Strengthened Test Coverage*

Oct 2020 – Sept 2022

- Optimized high-throughput Ruby on Rails APIs backed by **PostgreSQL**, improving system performance and reliability for large-scale transactional workloads by **60%** through query tuning, indexing and efficient data access
- Developed a high-volume React UI with AG Grid for uploading and validating large loan datasets, **reducing onboarding errors by 40%** and enabling smoother customer onboarding in collaboration with product and QA teams
- Integrated observability and monitoring using **Sentry** to track production errors, improving system reliability and reducing bugs by **35%**
- Strengthened** backend reliability by extending RSpec coverage for daily reporting modules, ensuring compliance with client SLAs and preventing regressions during releases

CodingMart Technologies, Product Development Engineer | Coimbatore, India

Sept 2019 – Aug 2020

- Built a **full-stack recruitment platform** using React and Node.js to streamline student applications, reducing manual screening effort and accelerating hiring decisions by **35%**
- Implemented CI/CD pipelines with **Docker** under **DevOps** practices to streamline deployments and enhance reliability
- Developed a Slack-style **PWA** using React.js and WebSocket for real-time messaging, boosting collaboration

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Ruby, HTML5, CSS3

Frontend: React.js, Redux, Next.js, Tailwind CSS, GraphQL, React Testing Library, Figma

Backend: Ruby on Rails, Node.js, REST API Design, Distributed Systems, Backend Architecture, RSpec, Kafka

Databases: PostgreSQL, MongoDB, Redis, MySQL

Cloud & DevOps: AWS (EC2, ECS, S3, Lambda, SQS), Docker, Git, GitHub, Jenkins, CI/CD

Development Practices: TDD, Agile, A/B Testing, Accessibility (WCAG), Performance Profiling (Lighthouse, Sentry)

EDUCATION

Master of Science in Computer Science - Binghamton University, State University of New York

Aug 2025

Bachelor of Technology in Information Technology - Bannari Amman Institute of Technology

June 2020
